

UTOPIA

**REDESIGN THE TERRITORY
TO TRANSFORM THE WORLD**

**ARTISTIC RESIDENCE IN CAMPUS MINEIRO, CABEÇO DO
PIÃO, FUNDÃO, PORTUGAL, 2022**

Organized by Penumbra Artistic Projects and ARS - ID, the Utopia project consisted of an artistic residence where 14 international artists from around the world took over the abandoned facilities of an old mine in Portugal. A territory left in oblivion where mountains of toxic waste lie still amidst multiple materials and old structures abandoned as an old wound in the earth's ground. The place was full of memories and a strange aura that transported us into a Tarkovsky movie set, and our mission as artists was to try to transform the forgotten space and to bring life and hope, creating a Utopia from this godforsaken place.

These are the photos of the installation I did using found objects and other "poor" materials such as cement, and combining them with natural plants from the environment.
